The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and exceptions. The filling of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators. Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific

An appropriative rights is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

(3) Appropriation of Water in California.

	1	GENERAL INFORMATION PERTAINING TO WATER	R RIGHTS IN CALIFORNIA
There as	re two prir	ncipal types of surface water rights in California. They are riparian and appr	opriative rights.
the same reservat Riparian	e watershe ion of the rights ma	nables an owner of land bordering a natural lake or stream to take and use wand as the water source and must never have been severed from the sources of riparian right to the severed parcel. Generally, a riparian water user must shap be used to divert the natural flow of a stream but may not be used to store need, water previously stored by others, return flows from use of grondwater,	supply by an intervening parcel without lare the water supply with other riparian users, water for later use or divert water which originates in
An appr	en there is	tht is required for use of water on nonriparian land and for storage of water. a surplus not needed by riparian water users. Since 1914, new appropriator propriate rights can be granted to waters "foreign" to the natural stream sys	s have been required to obtain a permit and license
with spe	cific exce s a new ap	er Diversion and Use must be filed by riparian and pre-1914 appropriative w ptions. The filing of a statement (1) provides a record of water use, (2) enab propriation upstream from their diversions, and (3) assists the State to determ	les the State to notify such users if someone
write to	this office	ion is provided for general information. For more specific information concess. We have several pamphlets available. They include: (1) Statements of Waalifornia, and (3) Appropriation of Water in California.	erning water rights, please contact an attorney or ate Diversion and Use, (2) Information Pertaining to

Was filed. (New pump, enlarged diversion dam location of diversion, etc.) I part of the water listed in Part C consists of reclaimed or polluted water, please indicate the annuamounts of reclaimed or polluted water in the space below. I deplare under penalty of perjury that the information in this report is true to the best of my knowledge and belief. DATED: SEP 2 6 1998 at San Francisco Californi SIGNATURE: PRINTED NAME: Jeffrey PACIFIC GAS AND ELECTRIC COMPANY GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA There are two principal types of surface water rights in California. They are riparian and appropriative rights. A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his ripar Riparian land must be in the same watershed as the water source and must never have been severed from the supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a water user must share the water supply with other riparian users. Riparian rights may be used to divert the nof a stream to take on the stream but may not be used to store water for later use or to divert water which originates in a different or return flow from use of groundwater. An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, a purights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new aphase been required to obtain a permit and license from the State. Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes appropriation upstream from their diversion, and (3) assists the State to notify such users if someone proposes appropriation in upstream from their diversion, and (3) assists the State to determine if additional water is available. They include: Statements of Water Diversion and	E. Changes in method o	f Diversion - Desc	ribe any char	nges in your	project since	e your previo	us statement

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different water-shed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.
